Skills

Languages: Proficient with Python, Lua and JavaScript, some experience with Elm and SQL.

Tools: Django, Git, Pytest, Hypothesis testing for Python, Wordpress, Drupal

Interests: Testing and test-driven development, object orientation

Education

Recurse Center, NYC - *Projects:*

- A web game with the backend using Django and the frontend using Elm.
- Contributed to the BeeWare VOC project, a Python-to-Java transpiler for Android development.
- Organized and hosted three workshops focused around testing and test-driven development; produced test suites for a number of small programs in multiple languages for the events.

Robert D. Clark Honors College at the University of Oregon - *B.A. Political Science*

Experience

AUGUST 2015 - MARCH 2016

Maine Historical Society - *Membership Manager*

- Acted as this museum's Raiser's Edge database expert, reporting to staff and committees, performing and overseeing data entry, running analytics, and importing large datasets.
- Expanded the functionality of the database to allow integration of event, marketing, and development outreach and results.
- Served on an internal committee to update and standardize software across the organization.

MAY 2012 - JUNE 2015

Maine Women's Fund - *Administrative Assistant*

- Managed and improved the database at the heart of this nonprofit.
- Recommended and deployed hardware and software to fit ever-changing needs.
- Worked closely with staff, accountant, and auditors to conduct and improve accounting.

FEBRUARY 2011 - SEPTEMBER 2012

Freelance Graphic Design - *Graphic Design Services*

- Generated layouts and graphic elements for use in portfolios, and presentations.
- Used the Adobe Creative Suite to create a polished and professional final project.
